

Solution providers for software design, application life cycle management and software development services.

Dunstan Thomas brings a powerful combination of experience, strong partnerships, industry expertise, and technology leadership. Established in 1986, we are partners with Microsoft as Certified Gold Partners, Sparx Systems and Borland.

We help clients in a wide range of industries meet their tactical, strategic, and business goals through successful, cost-effective implementation, integration and support of technology solutions.

Working closely with our clients, we build an understanding of your needs, advise how you can use technology to address them and provide you with solutions, together with the training, education and support to make effective use of them.

Our people are highly competent and experienced. They take a pragmatic approach and are committed to delivering results based on a clear understanding of business priorities and technical needs.

Here are some of the services that we provide:

- Help desk procedures
- Managed Services
- Upgrade Impact Analysis
- Upgrade Documentation
- Upgrade design/configuration
- On-site Support
- Upgrade Training
- Remote Support
- Upgrade Planning

Solution Selection

- Needs Analysis - Requirements
- Analysis of Readiness
- Vendor Evaluation
- Vendor Scoring Methodology
- Pricing Evaluation
- RFP Creation

Solution providers for software design, application life cycle management and software development services.

“Improving software development” is our key message. We help our clients improve the delivery of technology solutions through software design, software architecture and the software development process. Our aims are to provide clients with: sound, experience-based architectural guidance and consulting, a prescriptive approach through the use of proven design patterns and frameworks, a fully customised incremental software development process based on industry standards and best practices.
