

Integro CX Form Builder enables authorised users to create bespoke online forms

Highlights

- Built using Dunstan Thomas' award winning Integro CX Enterprise framework.
- Easy creation and distribution of online forms.
- Uses Integro CX components enabling quick formatting and validation.
- Completed forms can be downloaded to CSV format.
- Form data can be integrated to back office systems subject to customisation.
- Distributed forms can be accessed securely through ICX authentication.
- Save as draft option when completing forms
- Provide help text for form completion

Features

Security

- ICX Form Builder is authenticated using the ICX username and password, 3rd party authentication or single sign on integration.
- Separate Form Builder permissions for:
 - Form creation / amendment
 - Form publication
 - Form distribution to end users

Secure form completion

- Distributed forms can be completed online in a secure environment using the ICX username and password authentication.

Form creation

- The ability for authorised users to create their own eForms using the Integro CX component library
 - Textbox and Textarea
 - Radio Buttons
 - Dropdown lists
 - Check boxes
 - Numbers
 - Text blocks
 - Buttons
